### Unrecognized and Undeveloped Abilities

The challenge facing every educator is ensuring that each student reaches her or his fullest potential. Often we cannot clearly see what that potential is, but it is still our responsibility to support a student to achieve it. This workshop will give educators concrete ideas about how to fulfill the responsibility of helping a diverse array of students meet high standards. We will question a few longstanding assumptions about student ability and are likely to find that all students have the capacity to achieve at high levels.
